About Us

New International Technology W.L.L. (NITCO) is a well-experienced service provider for Operation and Maintenance of major sewage treatment systems and plants in Qatar since 1998. We have dedicated divisions operating for boiler services, mechanical maintenance/ electromechanical refurbishment, waste management/ environmental services, industrial cleaning services, technical assistance and maintenance of irrigation systems and landscape.

NITCO has been appointed as an authorized external commercial representative of Sofinter S.p.A.- Italy for the aftersales market in the State of Qatar. Sofinter group is a leader in the international energy market, providing plants and parts for steam production. It offers a full range of boiler services spanning from full Rehabilitations to Spare parts procurement. The Group provides plants and parts to produce steam for industrial use and power, for waste and water treatment, operating worldwide (with own primary brands Macchi and AC Boilers, formerly Ansaldo Caldaie).

Sofinter Group supports NITCO operations in Qatar with a proper transfer of know-how, technical assistance and project financing.

Local Partner Aljabor is a reputed business group active in Qatar and abroad in the implementation of excellent projects for infrastructure and industrial realizations. Aljabor supports NITCO for the implementation of commercial and business initiatives, along with direct local interventions.

NITCO has a skilled and permanent workforce of technical and administrative experts, and a large fleet of specialized vehicles and equipment. The Company offers excellent quality services with the highest safety standards to our esteemed clients providing them with the complete value for money.

The Quality Management System of NITCO is certified according to ISO 9001:2015 standards for design and provision of operation and maintenance services for sewage and water treatment system including refurbishment and upgrading of equipment and waste management services. NITCO is in compliance with the requirements of ISO 14001: 2015 Environmental Management System and also certified according to ISO 45001:2018 (Occupational Health and Safety Management System).

NITCO has successfully completed over the years several significant projects in the reference fields. Since 1998, we serve major government, semi government institutions and private clients such as QatarEnergy (Qatar Petroleum), Qatar Aluminium, Oryx GTL, Qatar Vinyl Company (Qapco), Keppel Seghers, QatarEnergy LNG (Qatargas), Veolia Water, Qatar Steel, Public Works Authority, Mowasalat, QDB, Qafco, United Development Company, Al Rayes and all major hotels operating in Qatar such as The Ritz Carlton, Intercontinental, Crowne Plaza, Marriott Marquis, Rotana City Centre, Oryx Rotana, Banana Island Resort, Sealine Beach Resort and many others.
